Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 12 recites in lines 1-3 "An apparatus for recording a movement of a user unit over base., which is provided with a position code, comprising a control unit which is adapted to perform a method". Comprising a control unit which is adapted to perform a method vague and indefinite because it is not necessarily performing it is just adapted to perform. Claim 12 should recite "An apparatus for recording a movement of a user unit over base., which is provided with a position code, comprising a control unit which perform a method of recording movement a user ".

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claim 14 is rejected as being directed non-statutory subject matter because independent claim 14, recites in the preamble "A computer-readable storage medium". Claim limitation reciting a computer-readable storage medium because it covers transitory computer readable medium such as computer readable carrier medium or propagating signal as stated in the specification in page 6, lines 28-33 . In order to avoid rejection under 35 USC 101, the claim may be amended to include explicit limitation of non-transitory computer readable medium such as computer memory, RAM, SRAM, DRAM etc. Further specification should be amended to define explicitly non-transitory computer readable medium such as memory, RAM, SRAM, DRAM etc and avoid transitory computer readable medium such as carrier medium or propagating signal.

Allowable Subject Matter

3. Claims 1-11 are allowable over prior art of record.
